# Puri-Fi Disposable Deionisers and filters

A range of highly convenient fully disposable cartridges offer users a variety of means of purifying water to suit individual needs.

These pressure resistant cartridges are suitable for in-line applications. Installed in moments, they are easily replaced when exhausted. A wall mounting bracket is offered for standard length cartridges. Disposable Deionisers contain high quality ion exchange resin. Water purity is indicated by resin colour change at two 'windows' in the cartridges casing. Will produce water quality as high as 0.1uS cm conductivity. Two sizes of deioniser are offered to satisfy user demand.

Organic removal cartridges contain activated carbon to effectively remove organics and chlorine from feedwater supplies. Incorporates a 50 micron filter to remove particulates.

Particulate filters contain wound fibre to remove particulate matter from feedwater supplies. Removal down to 50 micron.
